AUTHOR INDEX TO VOLUME 38

References with (A) are to abstracts of papers presented at meetings of the Physical Society and references with (L) are to Letters to the Editor.

Ahearn, A. J. Emission of secondary electrons from tungsten—1858, 1918(A)

Allison, Samuel K. Resolving power attainable in x-ray spectroscopy by photographic methods—203

——— **and Victor J. Andrew.** Experimental test of the ionization chamber method of measuring the relative intensities of x-ray spectrum lines—441

Almy, G. M. and G. D. Rahrer. Faint branches in the OH bands—1816

Almy, John E. Book review—1396

Anderson, O. E. (see More, K. R.)—1995

Andrew, Victor J. (see Allison, Samuel K.)—441

Aughey, Henry (see Kenny, A. W.)—1388(L)

Austin, J. B. Calculation of the characteristic frequency from the coefficient of compressibility—1788(L)

Bacher, R. F. (see Campbell, J. S.)—1906(L)

——— (see Meggers, W. F.)—1258(L)

Badger, Richard M. and John L. Binder. Absorption band in ethylene gas in the near infrared—1442

Badgley, Ralph E. (see Henderson, Joseph E.)—590(A)

Banta, H. E. (see Heaps, C. W.)—195(L)

Barker, E. F. (see Plyler, E. K.)—1827

Barnes, R. Bowling and M. Czerny. Concerning the reflection power of metals in thin layers for the infrared—338

Barrett, Charles S. Laue spots from perfect, imperfect, and oscillating crystals—832(L)

——— **and Carl E. Howe.** Regular reflection of x-rays from quartz crystals oscillating piezoelectrically. Some interpretations—2290(L)

Barth, Tom. F. W. (see Posnjak, E.)—2234

Bartlett, James H., Jr. Many-electron wave functions—1623

——— **and W. H. Furry.** Valence forces in lithium and beryllium—1615

——— Book reviews—1261, 1394, 1395, 2303

Bartlett, Russell S. Thermionic emission from a plane electrode—1566(L)

Bateman, H. On dissipative systems and related variational principles—815

Beams, J. W. (see Stevenson, E. C.)—133

Beams, J. W. (see Street, J. C.)—416

Bearden, J. A. Determination of e/m by the refraction of x-rays—1919(A)

——— Grating constant of calcite crystals—1389(L), 2089

——— Refraction of the copper K-series by quartz—835(L)

Becker, J. A. and R. W. Sears. Phenomena in oxide coated filaments II. Origin of enhanced emission—2193

Beeck, Otto and J. Carlisle Mouzon. Ionization of Kr and Xe by positive alkali ions and the ionization potentials of Ne, A, Kr, and Xe—967

Bender, Wm. Asymmetric Zeeman patterns at intermediate strengths of field in Ca I—588(A)

Bennett, R. D., J. C. Stearns, A. H. Compton. Constancy of cosmic rays—1566(L)

——— (see Compton, A. H.)—1565(L)

Berkey, W. E. and R. C. Mason. Measurements on the vapor stream from the cathode of a vacuum arc—943

——— (see Mason, R. C.)—1783(L)

——— (see Tanberg, R.)—296

Berry, N. E. and G. K. Rollefson. Transition probabilities and quenching in the $3P$ state of sodium—1599

Betsill, J. L. (see Doan, R. L.)—1922(A)

Binder, John L. (see Badger, Richard M.)—1442

Biswas, Susil Chandra. Diamagnetic susceptibility of the rare gas atoms according to Slater's method—1784(L)

Bitter, Francis. Magnetization and the magnetocaloric effect—528, 588(A)

——— Inhomogeneities in the magnetization of ferromagnetic materials—1903(L)

Blue, R. W. (see Giauque, W. F.)—196(L)

Bowen, I. S. Spectrum of doubly ionized carbon, C III—128

Bowers, Harold E. (see Harkins, William D.)—1845

Bozorth, R. M. and J. F. Dillinger. Transverse Barkhausen effect in iron—192(L)

Brackett, Fredrick S. and Urner Liddel. Infrared absorption bands of hydrogen cyanide in gas and liquid—582(A)

Bradbury, Norris. Absolute values of the mobilities of gaseous ions—1905(L)
——— (see Loeb, Leonard B.)—1716
Bradley, Charles A., Jr. (see Urey, Harold C.)—589(A), 718; 1969
Bramley, Arthur. Radioactive disintegration—1567(L)
Breit, G. Hyperfine structure of heavy elements—463
——— **and I. I. Rabi.** Measurement of nuclear spin—2082(L)
Brewer, A. Keith. Effect of adsorbed K^+ ions on the photoelectric threshold of iron—401
Brice, Brooks A. Absorption band spectra of silver bromide and silver iodide vapors—658
Bridgman, P. W. The P-V-T relations of NH_4Cl and NH_4Br, and in particular the effect of pressure on the volume anomalies—182
——— Book review—1082
Briggs, H. B. (see Ives, Herbert E.)—1477, 1917(A)
Brown, Joseph G. Relation of atmospheric space-charge to turbulence and convection—587(A)
Brown, Weldon G. Infrared absorption band system of iodine—1187
——— Note on the heat of dissociation of iodine—709
——— Vibrational quantum analysis of the visible absorption bands of bromine—1179
Brown, W. L. and H. McN. Cowan. Oscillations in discharge tubes—376(L)
Broxon, James W. Residual ionization in nitrogen at high pressures—1704
——— Dielectric constant of commercial nitrogen at high pressures—2049
Brune, O. Equivalent electrical networks—1783(L)
Bryden, Samuel D., Jr. Allowed levels for equivalent (s, p, d, f) electrons with (jj) coupling—1145
——— The structure of the nucleus and its total moment of momentum—1989
Bush, V. and S. H. Caldwell. Thomas-Fermi equation solution by the differential analyzer—1898

Calbick, C. J. (see Davisson, C. J.)—585(A)
Caldwell, S. H. (see Bush, V.)—1898
Callihan, Dixon (see Hatley, C. C.)—909
Campbell, J. S. and R. F. Bacher. Nuclear moments of indium and gallium—1906(L)
——— **and W. V. Houston.** Revision of values of e/m from the Zeeman effect—581(A)
Campbell, J. W. Book review—1910
Cardwell, Alvin B. Photoelectric and thermionic emission from cobalt—2033
——— Photoelectric properties of tantalum—2041
Carlson, J. F. and J. R. Oppenheimer. Range of fast electrons and neutrons—1787(L)
Child, C. D. Absorption of light by flames containing sodium—699
Chow, T. C. and H. D. Smyth. Emission and absorption spectra in sulphur dioxide—838(L)
Christy, Andrew (see Mulliken, Robert S.)—87
Claus, W. D. Effect of temperature on the intensity of x-rays diffusely scattered from rocksalt—604
Compton, A. H., R. D. Bennett, J. C. Stearns. Ionization as a function of pressure and temperature—1565(L)
——— (see Bennett, R. D.)—1566(L)
Condon, E. U. Book reviews—1081, 1909
Constant, F. W. (see Lowance, F. E.)—1547
Cook, S. R. Electromagnetic theory of sight and color vision—587(A)
Cooke, F. W. Ionization of caesium vapor by light—1351
Copley. M. J. (see Guthrie, A. N.)—360
Cork, James M. (see Fox, Gerald W.)—1420
Cotton, J. C. (see Knauss, H. P.)—1190
Coven, Allen W. Scattering of x-rays from paraffin, aluminum, copper and lead—1424
Cowan, H. McN. (see Brown, W. L.)—376(L)
Crigler, Elizabeth A. Intensity of Raman lines in estimating the concentration of the components present in benzene-toluene mixtures—1387(L)

Danforth, W. E., Jr. Dielectric constant of liquids under high pressure—1224
Davey, Wheeler P. (see Phelps, Robert T.)—1919(A)
Davisson, C. J. and C. J. Calbick. Electron lenses—585(A)
——— Book review—1262
Deming, W. Edwards and Lola E. Shupe. Some physical properties of compressed carbon monoxide—1920(A), 2245
Dennison, David M. and Norman Wright. New long wave-length absorption band of CS_2—2077(L)
Dieke, G. H. Perturbations in the helium band spectrum—646
Dillinger, J. F. (see Bozorth, R. M.)—192(L)
Dillon, J. H. Photoelectric properties of zinc single crystals—408
Doan, R. L. and J. L. Betsill. Force relations in drawing copper wire—1922(A)
Doermann, F. W. and Otto Halpern. Elastic scattering of electrons by spherically symmetrical atoms—193(L)
DuMond, Jesse W. M. and Archer Hoyt. A new K-series x-ray line due to Fermi-Sommerfeld electrons—839(L)

DuMond, Jesse W. M. and Harry A. Kirkpatrick. Dependence of Compton line breadth on primary wave-length with the multi-crystal spectrograph —1094

Dunnington, Frank G. Electro-optical shutter—its theory and technique—1506

——— Optical study of the formation stages of spark breakdown—1535

Edwards, Hiram W. Interference in thin metallic films—166

Edwards, R. L. (see Stewart, G. W.)—1575

Eldridge, John A. Book reviews—1793, 1794

Ellett, A. (see Zahl, H. A.)—977

Ellis, Joseph W. Polymers and new infrared absorption bands of water—582(A), 693

Epstein, Paul S. Modern statistics from the Gibbsian point of view—590(A)

Erikson, Henry A. Book review—1396

Estermann, I., R. Frisch and O. Stern. Diffraction experiments with monochromatic molecular beams —584(A)

Fisher, Thomas F. (see Serduke, James T.)—1922 (A)

Focke, A. B. (see Goetz, A.)—1569(L)

Forsythe, W. E. Intercomparison of the high temperature scale—1247

Fowler, R. H. Analysis of photoelectric sensitivity curves for clean metals at various temperatures— 45

Fox, Gerald W. and James M. Cork. Regular reflection of x-rays from quartz crystals oscillating piezoelectrically—1420

Frank, N. H. Theory of thermionic emission—1918 (A)

——— **and L. A. Young.** Transmission of electrons through potential barriers—80

——— (see Young, L. A.)—838(L)

Freed, Simon. Electronic transitions between an inner shell and the virtual outer shells of the ions of the rare earths in crystals—2122

——— **and Frank H. Spedding.** Diagram of some of the energy levels of gadolinium IV in the crystal lattice as obtained from the ultraviolet absorption spectra of $GdCl_3 \cdot 6H_2O$ and $GdBr_3 \cdot 6H_2O$ —670

Frenkel, J. Some remarks on the theory of the photoelectric effect—309

Frisch, R. (see Estermann, I.)—584(A)

Furry, W. H. (see Bartlett, James H., Jr.)—1615

Gartlein, C. W. and R. C. Gibbs. Production of second and third spark spectra in a hollow cathode lamp—1907(L)

Giauque, W. F., R. W. Blue, Roy Overstreet. Entropies of methane and ammonia—196(L)

Gibbs, R. C. and P. G. Kruger. Some evidence indicating the existence of Ba isotopes 136 and 137 —1921(A)

——— (see Gartlein, C. W.)—1907(L)

——— (see Shapiro, C. V.)—1170

Gideon, Edith (see Henderson, Joseph E.)—586(A)

Gilroy, Helen T. Certain spectra in the vanadium I iso-electronic sequence—2217

Glasoe, G. Norris. Contact potential difference between iron and nickel and their photoelectric work functions—1490

Goetz, A. and A. B. Focke. Metamagnetism in bismuth crystals—1569(L)

——— **and R. C. Hergenrother.** Macroscopic and lattice expansion of Bi single crystals—2075(L)

Gortner, R. A. Book reviews—2084, 2088

Goudsmit, S. and L. Gropper. Many-electron selection rules—225

Gray, Newton M. and Lawrence A. Wills. Note on the calculation of zero order eigenfunctions—248

Green, J. B. and R. A. Loring. Multiplet structure and Zeeman effect—1289

——— **and John Wulff.** Paschen-Back effect of hyperfine structure I. Tl II and Tl III—2176

——— **and John Wulff.** Paschen-Back effect of hyperfine structure II. Bi II and Bi III—2186

Gropper, L. (see Goudsmit, S.)—225

Gunn, Ross. Stability of the atmosphere of a rotating star—1052

Guthrie, A. N. and M. J. Copley. Magnetic moment of the palladium atom—360

Hall, Harvey. Relativistic theory of the photoelectric effect. Part I. Theory of the K-absorption of x-rays—57

——— **and J. R. Oppenheimer.** Part II. Photoelectric absorption of ultragamma radiation—57, 589(A)

Halpern, Otto (see Doermann, F. W.)—193(L)

Harder, Oscar E. Book reviews—1573

Hardy, J. D. High resolution in the infrared—2162

Harkins, William D. Periodic system of atomic nuclei and the principle of regularity and continuity of series—1270; a correction—1792(L)

——— **and Harold E. Bowers.** Raman effect and the carbon-halogen bond—1845

ANALYTIC SUBJECT INDEX TO VOLUME 38

References marked (A) are to abstracts of papers presented at meetings of the Physical Society, those marked with (L) are to Letters to the Editor.

Absorption of light (see also **Spectra, absorption**)
By flames containing sodium, C. D. Child—699
Transmission of visible light through fog, H. G. Houghton—152; theoretical investigation, J. A. Stratton, H. G. Houghton—159

Acoustics
Resonator interferometer, equivalent electric network, J. C. Hubbard—1011
Supersonic waves, velocity, W. H. Pielemeier—1236

Alpha-particles (see also **Radioactivity**)
Anomalous scattering, Morris Muskat—23

Arcs (see also **Discharge of electricity in gases**)
Cathode fall for thermionic and high field arcs, R. C. Mason—427
Temperature of cathode, vapor stream, R. Tanberg, W. E. Berkey—296
Transition from glow to arc, S. S. Mackeown—584(A)
Velocity of, vapor stream from cathode, R. Tanberg, W. E. Berkey—296, W. E. Berkey, R. C. Mason—943, 1783(L) B. Wellman 1077(L)

Astrophysics
Intensities of Balmer emission lines in stellar spectra, O. Struve, H. F. Schwede—1195
Nebular red shift and universal constants, J. Q. Stewart—2071(L)
Stability of atmosphere of a rotating star, electromagnetic fields, R. Gunn—1052

Atomic and molecular beams
Absorption of H^+, H_2^+, H_3^+ in A and He, R. E. Holzer—585(A)
Diffraction of He by LiF crystals, I. Estermann, R. Frisch, O. Stern—584(A)
Electrical field giving uniform deflecting force on a molecular beam, E. McMillan—1568(L)
Of Pd, A. N. Guthrie, M. J. Copley—360
Reflection of H atom from LiF, T. H. Johnson—586(A)
Reflection of Hg from alkali halide crystals, H. A. Zahl, A. Ellett—977

Atomic structure (see also **Energy states of atoms, Spectra**)
Dirac electron cloud for hydrogen-like atoms, pictorial representation, H. E. White—513,589(A)
Evaluation of the matrix components for He, L. P. Smith—1961
Natural units for atomic problems, A. E. Ruark—2240

Atomic structure factors
Of Cu and O in Cu_2O, G. A. Morton—41
In polyatomic gases, G. E. M. Jauncey—194(L)
Scattering of x-rays by gases and crystals, G. E. M. Jauncey—1; G. E. M. Jauncey, G. G. Harvey—1071(L)
For sylvine, G. G. Harvey—593; at low temperature, G. E. M. Jauncey, G. G. Harvey—1925

Atmosphere (see **Meteorology, atmospheric electricity**)

Atmospheric electricity (see also **Aurora, Meteorology**)
Relation of atmospheric space-charge to turbulence and convection, J. G. Brown—587(A)

Aurora
Auroral spectrum, nitrogen afterglow, J. Kaplan—582(A)
Green line and predissociation in N_2 J. Kaplan—1079(L); a correction 1792(L)
Light of night sky and aurora lines, J. Kaplan—1048

Book reviews
Allen, Frank. The Universe—2301
Annales de l'Institute Henri Poincare, Vol. I, sections i, ii, and iii—1395, section iv—2303

Brownian movement
Of strings and elastic rods, G. A. Van Lear, Jr., G. E. Uhlenbeck—1583

Compressibility
Characteristic frequency from compressibility, J. B. Austin—1788(L)
Compton effect (see **X-rays, diffraction, scattering, reflection and refraction**)
Conductivity, thermal (see **Thermal conductivity**)
Contact potentials
Of Fe – Ni compared with photoelectric work function, G. N. Glasoe—1390
Cosmic radiation
Constancy of rays, R. D. Bennett, J. C. Stearns, A. H. Compton—1566(L)
Detection by Wilson cloud apparatus and Geiger-Müller counter, L. M. Mott-Smith, G. L. Locher—1399
Ionization as a function of pressure and temperature, A. H. Compton, R. D. Bennett, J. C. Stearns—1565(L)
Ionization in N_2 at high pressures, J. W. Broxon—1704, and neutronx, L. D. Huff—2292(L)
Range of fast electrons and neutrons, J. F. Carlson, J. R. Oppenheimer—1787(L), criticism, W. H. Watson. F. R. Terroux—2291(L)
Crystals and crystal structure
Of AsI_3, D. Heyworth—351, errata 1792(L)
Crystalline rubber hydrocarbon, E. W. Washburn—1790(L)
Electrical properties of S. P. single crystal zinc, E. P. T. Tyndall, A. G. Hoyem—820 A. G. Hoyem—1357
Fine-structure of lithium ferrite, E. Posnjak, T. F. W. Barth—2234
Graphical determination of crystal lattices from x-ray powder method data, W. Soller—583(A)
Grating constant for calcite crystals, J. A. Bearden—1389(L), 2089
Increase in surface area due to etching, L. Tonks—1030
Magnetic anisotropy of XO_3 ions, K. S. Krishnan—833(L)
Magneto-caloric effect in single crystals, F. Bitter 528, 588(A)
Of $NaNO_2$, G. E. Ziegler—1040
Permanent electric and magnetic moments, F. Zwicky—1772
Photoelectric properties of zinc single crystals, J. H. Dillon—408
Secondary structure of LiF, T. H. Johnson—586(A)
X-ray diffraction patterns of mixtures, A. W. Kenney, H. Aughey—1388(L)
X-ray reflection from crystals oscillating piezoelectrically, G. W. Fox, J. M. Cork—1420; B. E. Warren—572(L) R. M. Langer—573(L); C. S. Barrett—832(L); S. Nishikawa, Y. Sakisaka, I. Sumoto—1078(L) C. S. Barrett, C. E. Howe—2290(L)
Cybotactic state
In isotropic liquids and liquid crystals, G. W. Stewart—931
In octyl alcohols, G. W. Stewart, R. L. Edwards—1575, G. W. Stewart—2082(L)
Various organic mixtures, A. W. Meyer—1083
Diamagnetism (see **Magnetic properties**)
Dielectric constants
Electric moment of crystals, F. Zwicky—1772
Of liquids under high pressure, W. E. Danforth, Jr.—1224
Of N_2 at high pressure, J. W. Broxon—2049
Of organic liquids, W. R. Pyle—1057
Temperature variation of the electric moment of ethylene chloride, C. T. Zahn—521
Diffraction of atoms (see **Atomic and molecular beams**)
Diffusion
Reciprocal relations in irreversible processes: II, L. Onsager—2265
Discharge of electricity in gases (see also **Arcs, Electrons in gases**)
Capture and loss of He ions in He, P. Rudnick—1342
Cathode fall for thermionic and high field arcs, R. C. Mason—427
Diffusion of electrons back to an emitting electrode, I. Langmuir—1656
Dissociation of water in the glow discharge, E. G. Linder—679
Electronic velocities in high frequency discharges, E. Hiedemann—198(L)
Fall of potential in the initial stages, J. C. Street, J. W. Beams—416
Oscillations in discharge tubes, W. L. Brown, H. McN. Cowan—376(L)
Plasma-electron resonance and plasma resonance, L. Tonks—1219
Secondary electrons from Ni in He glow discharge, M. C. Harrington—1312
Discharge of electricity in high vacua (see also **Electrons, thermionic; High voltage tubes, machines**)
Work required to remove a field electron, J. E. Henderson, R. E. Badgley—590(A)
Dissociation
Of H_2O in glow discharge, E. G. Linder—679
Dissociation, heat of (see also **Molecular structure and constants**)
Of AgBr and AgI, B. A. Brice—658
Of H_2O, E. G. Linder—679
Of I_2 from band spectra, W. G. Brown—709
Of Li_2 and Be_2, J. H. Bartlett, Jr. W. H. Furry—1615

Doppler effect
In Ne canal rays, W. Romig—1709
In x-rays, by electrons in scattering body, J. W. M. DuMond, H. A. Kirkpatrick—1094
Dynamics
Canonical transformation for vibrations of loaded strings, R. B. Lindsay—491
Dissipative systems and related variational principles, H. Bateman—815
Elasticity
Characteristic frequency from compressibility, J. B. Austin—1788(L)
Force relations in drawing Cu wire, R. L. Doan, J. L. Betsill—1922(A)
Strain-energy function for isotropic bodies, C. Kaplan—1020
Electrical conductivity and resistance
Reciprocal relations in irreversible processes: II, L. Onsager—2265
Of single crystal zinc, E. P. T. Tyndall, A. G. Hoyem—820, A. G. Hoyem—1357
Electrical circuits
Acoustic resonator interferometer, equivalent electric network, J. C. Hubbard—1011
Equivalent networks, O. Brune—1783(L)
Electrical oscillations and waves
Ultra-short undamped waves, G. V. Potapenko—584(A)
Electric moment (see **Dielectric constant**)
Electrodeless discharge
Method of measuring induced current, C. T. Knipp, J. K. Knipp—948
Electromagnetic theory
Light quanta and the electromagnetic field, J. R. Oppenheimer—725
Problem of rotating magnets, W. B. Pietenpol, E. C. Westerfield—2280
Electrons
Transmission through potential barriers, N. H. Frank, L. A. Young—80, W. Wetzel 1205, W. B. Nottingham—1918(A)
Value of charge from shot effect, B. A. Kingsbury—1458, 1922(A)
Electron distribution in atoms
Of monatomic gases, E. O. Wollan—15
In rare earths in crystals, S. Freed—2122
By scattering of x-rays, G. E. M. Jauncey—1; G. E. M. Jauncey, G. G. Harvey—1071(L)
Stark effect, stereophotographic models, R. W. Wood—346
Electrons in gases
Capture and loss of He ions in He, P. Rudnick—1342
Electrons in metals
Equilibrium distribution outside conductor, A. T. Waterman—1497
Electrons, scattering of (see also **Electrons in gases**)
Probabilities in He, Ne and A, L. C. Van Atta—876
By spherically symmetrical atoms, F. W. Doermann, O. Halpern—193(L)
In thin metal foils, comparison with theory, H. V. Neher—585(A), 1321
Electrons, secondary
Negative ions by bombardment of Pt, J. S. Thompson—1389(L), K.S. Woodcock—1696(L)
From Ni, bombarded by He ions and metastable atoms, M. C. Harrington—1312
From Pt by bombardment with Hg ions, J. E. Henderson, E. Gideon—586(A)
From thin metal foils, H. V. Neher—585(A), 1321
From W, A. J. Ahearn—1858, 1918(A)
Electrons, thermionic
From Co, change with temperature, A. B. Cardwell—2033
Effect of space charge, R. S. Bartlett—1566(L)
Electron and potential distribution outside conductor, A. T. Waterman—1497
Enhanced emission in oxide coated filaments, J. A. Becker, R. W. Sears—2193
Photoelectric and thermionic work function, W. S. Huxford—379
Theory of emission, N. H. Frank—1918(A)
Transmission through potential barrier of thoriated filament, W. B. Nottingham—1918(A)
Electro-optical effects (see also **Photoelectric effect and properties**)
Electro-optical shutter, electric circuit of, H. W. Washburn—584(A)
Electro-optical shutter, theory and technique, F. G. Dunnington—1506
Kerr effect in gases, E. C. Stevenson, J. W. Beams—133
Kerr effect in Rochelle salt, H. Müller—1922(A)
Electrostatics
Potential due to a buried spheroid, J. H. Webb—2056
1,500,000 volt electrostatic generator, R. J. Van de Graaff—1919(A)
e/m
From quantum mechanical calculation, L. D. Huff—501, 589(A)
By refraction of x-rays, J. A. Bearden—835(L), 1919(A)
From Zeeman effect, J. S. Campbell, W. V. Houston—581(A)
Energy states of atoms (see also **Atomic structure, Spectra, atomic**)
Of Gd IV in crystal lattice, S. Freed, F. H. Spedding—670
Levels for equivalent (s, p, d, f) electrons with (jj) coupling, S. D. Bryden, Jr.—1145
Of rare earth ions in crystals, S. Freed—2122

Energy states of molecules (see **Molecular structure and constants, Spectra, molecular**)
Entropy
Of ammonia and methane, D. S. Villars—1552, 1920(A) W. F. Giauque, R. W. Blue, Roy Overstreet—196(L) D. P. MacDougall 2074(L)
Of the universe, R. C. Tolman—797, 1758
Equations of state
General adiabatic equation for gases, T. C. Huang —1385
P-V-T relations of NH_4Cl and NH_4Br, P. W. Bridgman—182
Properties of CO, W. E. Deming, L. E. Shupe—1920(A), 2245
Quantum theory of, J. C. Slater—237
For real gases, H. Margenau—1785(L)
Second virial coefficient, J. G. Kirkwood, F. G. Keyes—576(L), H. Margenau—1785(L)
van der Waals attractions, H. Margenau,—747
Errata
Excitation of high optical energy levels J. E. Mack—2300(L)
A new criterion for predissociation J. Kaplan —1792(L)
Note on the crystal structure of AsI_3 D. Heyworth—1792(L)
Excitation of atoms and molecules
Average life of H^+, L. R. Maxwell—1664
Of high optical energy levels, J. E. Mack—193(L), errata—2300(L)
Low voltage excitation of Na, probability measurements, W. C. Michels—712
Transition probabilities and quenching in Na, N. E. Berry, G. K. Rollefson—1599
Fluorescence
In iodine, effect of argon, L. A. Turner—574(L)
Transition probabilities and quenching, N. E. Berry, G. K. Rollefson—1599
Gamma-rays
Photoelectric absorption, H. Hall, J. R. Oppenheimer, 57, 589(A)
Gases
Properties of CO, W. E. Denning, L. E. Shupe 1920(A), 2245
Gravitation
Absolute determination of gravity, A. C. Longden —1920(A)
Hall effect
In solid mercury, J. T. Serduke, T. F. Fisher—1922(A)
Heat of combustion
Internal molecular potentials, H. A. Stuart—1372
Heat transfer
From solid surfaces to air, R. B. Kennard—1921(A)
High voltage tubes and machines (see also **Ions, high speed**)
Production of high speed ions without the use of high voltages, D. H. Sloan, E. O. Lawrence—2021; E. O. Lawrence, M. S. Livingston—834(L)
500 kilovolt cathode rays, R. E. Vollrath—212
1,500,000 volt electrostatic generator, R. J. Van de Graaff—1919(A)
Hydrodynamics
Stability of a single file of straight vortices, A. T. Jones—2068
Hyperfine structure
Effect on polarization of Cd resonance radiation, A. C. G. Mitchell—473
Of Bi II and Bi III, J. B. Green, J. Wulff—2193
Of heavy elements, theory, G. Breit—463
Of In and Ga, J. S. Campbell, R. F. Bacher—1906(L)
Of Tl II and Tl III, J. B. Green, J. Wulff—2176
Nuclear magnetic moments from hyperfine structure, S. W. Nile—375(L)
Nuclear moment of Re I, W. F. Meggers, A. S. King, R. F. Bacher—1258(L)
Nuclear moment of K, F. W. Loomis, R. W. Wood —854; F. W. Loomis—2153
Intensities in spectra (see also **Spectra, etc.**)
Of Balmer emission lines (stellar) O. Struve, H. F. Schwede—1195
Band spectrum intensities by graphical methods, E. Hutchisson—1921(A)
Of He band, $\lambda 600$ J. L. Nickerson—1907(L)
Summation rules and perturbation effects in complex spectra, G. R. Harrison, M. H. Johnson, Jr.—757
Of V I and V II, G. R. Harrison—1921(A)
Interference phenomena
In thin metallic films, H. W. Edwards—166
Ionization by impact (see also **Potentials, critical**)
As function of pressure and temperature, A. H. Compton, R. D. Bennett, J. C. Stearns—1565(L)
Of Kr and Xe by positive alkali ions, O. Beeck, J. C. Mouzon—967
Negative ions by bombardment of Pt. J. S. Thompson—1389(L), K. S. Woodcock—1696(L)
Ionization potentials (see **Potentials critical**)
Ionization by radiation (see **Photoionization**)
Ions, high speed (see also **High voltage tubes and machines**)
Hg ions, E. O. Lawrence, D. H. Sloan—586(A)
500 kilovolt cathode rays, R. E. Vollrath—212
Ions in gases
Average life of H^+, L. R. Maxwell—1664
Bombardment of platinum by Hg, J. E. Henderson, E. Gideon—586(A)

Ions in gases (continued)
Mass of gas ions in air, N_2, O_2, and SO_2 from glow discharge, O. Luhr—1730
Mass spectrograph analyses of ions in N_2 and CO, A. L. Vaughan—1687
Negative hydrogen ions from H_2O, D. W. Mueller, H. D. Smyth—1920(A)
Ions, mobility (see also **Ions in gases**)
Absolute values, N. E. Bradbury—1905(L)
Aging of ions in air and N_2, J. Zeleny—969, 2293(L)
Of Na^+ ions in N_2 and H_2 as a function of time, nature of ion, L. B. Loeb—549, 586(A)
Velocity spectrum of ions in air and problem of ionic structure, L. B. Loeb, N. E. Bradbury—1716, J. Zeleny—2293(L)
Isotopes
Atomic species, regularities and continuity of series, W. D. Harkins—1270, 1792(L)
Of Ba, 136 and 137, R. C. Gibbs, P. G. Kruger—1921(A)
Relative abundance of N^{14} and N^{15}, H. C. Urey, G. M. Murphy—575(L)
Relative abundances, H. C. Urey, C. A. Bradley, Jr.—589(A), 718
Search for $O^{18}H$, G. M. Almy, G. D. Rahrer—1816
Liquids (see also **Hydrodynamics**)
General x-radiation and diffraction by liquids, W. C. Pierce—1409
Higher order effects in x-ray diffraction, W. C. Pierce—1413
Magnetic character of liquid crystalline para-azoxyanisol, G. W. Stewart—931
Surface energy of liquids, H. Margenau—365
Magnetic properties
Of An-Fe alloys, J. W. Shih—2051
Anisotropy of XO_3 ions, K. S. Krishnan—833(L)
Of colloidal suspensions, C. G. Montgomery—1782(L)
Of Cu-Ni alloys, E. H. Williams—628
Diamagnetic susceptibility of the rare gas atoms, S. C. Biswas—1784(L)
Effect of internal stress, C. W. Heaps, H. E. Banta—195(L)
Inhomogeneities in the magnetization, F. Bitter—1903(L)
Of liquid crystalline para-azoxyanisol, G. W. Stewart—931
Magneto-caloric effect and mechanism of magnetization, F. Bitter—528, 588(A)
Metamagnetism in Bi crystals, A. Goetz, A. B. Focke—1569(L)
Moment of the Pd atom, A. N. Guthrie, M. J. Copley—360
Moment of S_2, E. J. Shaw, T. E. Phipps—174
Permanent moments of crystals, F. Zwicky—1772
Reversed magnetization in strained wires, I. Langmuir, K. J. Sixtus—2072(L)
Structure sensitiveness of Cu, Ag, Pt, and Bi, F. E. Lowance, F. W. Constant—1547
Transverse Barkhausen effect in Fe, R. M. Bozorth, J. F. Dillinger—192(L)
Thermocouples of longitudinally and transversely magnetized wires of Ni and of Fe, W. H. Ross—179; S. Sears—1254; C. W. Heaps—1391(L)
Mechanics (see **Dynamics**)
Mechanics, quantum—atomic structure and spectra
Dirac electron cloud for H like atom, pictorial representation, H. E. White—513, 589(A)
Evaluation of the matrix components for He, L. P. Smith—1961
Many-electron wave functions, J. H. Bartlett, Jr.—1623
Of two-electron systems, M. H. Johnson, Jr.—1628
Mechanics, quantum—general
Collision problems involving large interactions, O. K. Rice—1943
General solution of Schrödinger's equation and the uncertainty principle, E. L. Hill—2115
Inelastic collisions, C. Zener—277, 588(A)
Inverse-cube central force field, G. Shortley—120
Light quanta and the electromagnetic field, J. R. Oppenheimer—725
Local momentum in wave mechanics, L. A. Young—1612
Motion of a Dirac electron in a magnetic field, value of e/m, L. D. Huff—501, 589(A)
Natural units for atomic problems, A. E. Ruark—2240
One-dimensional problems in quantum mechanics, E. L. Hill—1258(L)
Quadrupole forces in van der Waals attractions, H. Margenau—747
Quantization of large scale events, D. L. Watson—1072(L)
Reflection coefficients and their numerical determination, V. Rojansky, W. Wetzel—1979
Reflection of electrons by a special potential field, E. L. Hill—1072(L)
Schrödinger potential function, R. M. Langer—779
Tables of integrals and functions, N. Rosen—2099
Theory of equation of state, J. C. Slater—237
Transmission of electrons through potential barriers, N. H. Frank, L. A. Young—80, W. Wetzel—1205
Wave mechanics quantization of loaded string, R. B. Lindsay—491
Zero order eigenfunctions, N. M. Gray, L. A. Wills—248

Mechanics, quantum—molecular structure and spectra
Electron pair bond, W. Heitler—243
Energy levels and valence bonds, J. C. Slater—1109
Interaction between atoms with *s*-electrons, N. Rosen—255
Normal state of H_2, N. Rosen—2099
Mechanics, statistical
Types of statistics, models, P. S. Epstein—590(A)
Metals
Colors of thin films, H. W. Edwards—166
Metastable atoms and molecules
Life of Hg and N_2, M. L. Pool—955
Metastable atom emission of electrons from surfaces, C. Kenty—377(L)
Meteorology
Of the earth, temperature effect of O_3 and CO_2, E. O. Hulburt—1876
Heat transfer from solid surfaces to air, R. B. Kennard—1921(A)
Ultraviolet band of ozone, effect of temperature, O. R. Wulf, Eugene H. Melvin—330
Methods and instruments
Absolute determination of gravity, A. C. Longden—1920(A)
Band spectrum intensities by graphical methods, E. Hutchisson—1921(A)
Concentrations from Raman spectra, E. A. Crigler—1387(L)
Double x-ray spectrometer, R. C. Spencer—618
Effect of inductance on damped galvanometer, T. M. Dahm—590(A)
Electrical field giving uniform deflecting force on a molecular beam, E. McMillan—1568(L)
Electron lenses, apertures in charged conductors, C. J. Davisson, C. J. Calbick—585(A)
Electro-optical shutter, theory and technique, F. G. Dunnington—1506
Excitation of high optical energy levels, J. E. Mack—193(L), errata—2300(L)
Heterochromatic photographic photometry, G. R. Harrison, P. A. Leighton—899
High resolution in the infrared, J. D. Hardy—2162
Improved technique for Raman effect, R. W. Wood—2168
Induced currents in glow discharge, C. T. Knipp, J. K. Knipp—948
Infrared spectroscopy, J. Strong—1818
Ionization chamber method of measuring intensities of x-ray lines, S. K. Allison, V. J. Andrew—441
Intercomparison of the high temperature scale, W. E. Forsythe—1247
500 kilovolt cathode rays, R. E. Vollrath—212
1500 kilovolt electrostatic generator, R. J. Van de Graaff—1919(A)
Method of producing negative ions, J. S. Thompson—1389(L)
Na arc, N. E. Berry, G. K. Rollefson—1599
Reflecting power and grating efficiency in the extreme ultraviolet, H. M. O'Bryan—32
Reflection power of metals in thin layers for the infrared, R. B. Barnes, M. Czerny—338
Removal of continuous background from Raman spectra, M. E. High, M. L. Pool—374(L)
Resolving power of double crystal x-ray spectrometer, S. K. Allison—203
Second and third spark spectra in a hollow cathode lamp, C. W. Gartlein, R. C. Gibbs—1907(L)
Supersonic satellites and velocity, W. H. Pielemeier—1236
Three-dimensional vibrograph, J. E. Shrader—1923(A)
Thomas-Fermi equation solution by the differential analyzer, V. Bush, S. H. Caldwell—1898
Mobility of ions (see **Ions, mobility**)
Molecular structure and constants (see also **Spectra, molecular, Raman spectra**)
Energy levels and valence bonds, J. C. Slater—1109
From heats of combustion, for substituent groups in benzene ring, H. A. Stuart—1372
Of the groups XO_3, J. C. Slater—325
Heat capacities and relative amounts of nuclear modifications of methane, D. S. Villars, G. Schultze—998, D. P. MacDougall—2296(L)
Heat of dissociation of Li_2, F. W. Loomis, R. E. Nusbaum—1447
Magnetic moment of S_2, E. J. Shaw, T. E. Phipps—174
Moments of inertia of ethylene, R. M. Badger, J. L. Binder—1442
Of N_2O, E. K. Plyler, E. F. Barker—1827
Raman effect and the carbon-halogen bond, W. D. Harkins, H. E. Bowers—1845
Normal state of H_2, N. Rosen—2099
Valence forces in Li and Be, J. H. Bartlett, Jr., W. H. Furry—1615
Vibrational frequency in the normal state of benzene, C. V. Shapiro, R. C. Gibbs, J. R. Johnson—1170
Vibrations of pentatonic tetrahedral molecules, H. C. Urey, C. A. Bradley, Jr.—1969
Of the water vapor molecules, E. K. Plyler—1784(L)
Multiplets (see also **Spectra, atomic**)
Displacement in isoelectronic sequence, H. T. Gilroy—2217
Zeeman effect in Sn III and Sb I, J. B. Green, R. A. Loring—1289

Neutrons
Cosmic rays, L. M. Mott-Smith, G. L. Locher—1399, L. D. Huff—2292(L)
Range of fast electrons and neutrons, J. F. Carlson, J. R. Oppenheimer—1787(L), W. H. Watson, F. R. Terroux—2291(L)
Nuclear spin (see also **Hyperfine structure**)
Absence of, R. M. Langer—837(L)
Alternating intensities of Na_2 bands, H. C. Urey—1074(L)
Classification of elements, S. D. Bryden, Jr.—1989
Of In and Ga, J. S. Campbell, R. F. Bacher—1906(L)
Of K, F. W. Loomis, R. W. Wood—854; F. W Loomis—2153
Measurement by Stern-Gerlach experiment, G. Breit, I. I. Rabi—2082(L)
Of Re I, W. F. Meggars, A.S. King, R. F. Bacher——1258(L)
Spin of protons in nucleus, H. E. White—2078(L)
Nucleus
Atomic species, regularities and continuity of series, W. D. Harkins—1270, 1792(L)
Structure and moment of momentum, S. D. Bryden, Jr.—1989
Optical constants and properties
Reflection power of metals in thin layers for the infrared, R. B. Barnes, M. Czerny—338
Optical instruments (see **Methods and instruments**)
Paschen-Back effect (see **Zeeman effect**)
Periodic system of atoms
Atomic species, regularities and continuity of series, W. D. Harkins—1270, 1792(L)
Photoelectric effect and properties
In caesium-oxide photocells at room temperatures, E. F. Kingsbury—1918(A)
Of Co, change with temperature, A. B. Cardwell—2033
Effect of adsorbed K^+ ions on threshold of iron, A. K. Brewer—401
Effect of electric fields on the emission from oxide cathodes, W. S. Huxford—379
Efficiencies in the extreme ultraviolet, C. Kenty—2079(L)
Of Hg, thin films, D. Roller—396
Lateral distribution of x-ray photoelectrons, P. Kirkpatrick—1938
Photoelectric and metastable atom emission of electrons from surfaces, C. Kenty—377(L)
Relativistic theory, H. Hall, J. R. Oppenheimer—57, 589(A)
Selective effect from two-component cathodes, A. R. Olpin—1745, 1917(L), W. H. Zachariasen, 2290(L)
Shot effect in photoelectric currents, B. A. Kingsbury—1458, 1922(A)
Of Ta, effect of temperature, A. B. Cardwell—2041
Temperature variation of photoelectric sensitivity, R. H. Fowler—320, L. A. Young and N. H. Frank—838(L)
Theory of photoelectric effect in hydrogen-like atom, angular distribution, J. Frenkel—309; E. L. Hill—1072(L), A. Sommerfeld—1078(L)
Thin films of alkali metal on silver, H. E. Ives, H. B. Briggs—1477, 1917(A)
Of thin unbacked gold films, R. P. Winch—321
Threshold for W by Fowler's method, A. H. Warner—1871
Vectorial effect in thin films of alkali metals, H E. Ives—1209, 1917(A)
Work function of Fe and Ni compared with contact potentials, G. N. Glasoe—1490
Of zinc single crystals, J. H. Dillon—408
Photography
Parallax panoramagrams made with a large diameter concave mirror, H. E. Ives—1922(A)
Photoionization
Of Cs vapor, F. W. Cooke—1351
In high pressure chamber, A. H. Compton, R. D. Bennett, J. C. Stearns—1565(L)
In N_2 at high pressure by cosmic rays, J. W. Broxon—1704
Photometry
Fluorescence and heterochromatic photographic photometry, G. R. Harrison, P. A. Leighton—899
Piezoelectric effect
Oscillation of crystals and x-ray diffraction, B. E. Warren—572(L), R. M. Langer—573(L), C. S. Barrett—832(L), S. Nishikawa, Y. Sakisaka, I. Sumoto—1078(L), G. W. Fox, J. M. Cork—1420, C. S. Barrett, C. E. Howe—2290(L)
Plasmoidal discharges (see **Discharge of electricity in gases**)
Polymerization
In water, J. W. Ellis—693
Potentials, critical
For ions by electron impact in N_2 and CO, A. L. Vaughan—1687
Ionization of C III, I. S. Bowen—128
Of Kr and Xe by positive alkali ions, O. Beeck, J. C. Mouzon—967
Potentials, critical (see also **Ionization potentials**)
Probabilities of energy losses in He, Ne and A, L. C. Van Atta—876
Ultra-ionization potentials of Hg, probability law, C. R. Haupt—282

Potentials, critical (see also **Ionization potentials** (continued)
Ultra-ionization potentials of He, Ne and A, R. L. Womer—454
Ultra-ionization potentials in Hg vapor, A. G. Shenstone—873
Ultra-ionization potentials and spectral data, H. E. White—1786(L), 2016
Predissociation
Enhancement of, by collisions, L. A. Turner—574(L)
In N_3, J. Kaplan—373(L), 1079(L); a correction—1792(L)
A new criterion, J. Kaplan—1079(L); errata—1792(L)
Proceedings of the American Physical Society
Pasadena Meeting, June 15 to 20, 1931—579
Schenectady Meeting, September 10 to 12, 1931—1915
Radiation (see **Thermal radiation**)
Radioactivity
Anomalous scattering of alpha-rays, M. Muskat—23
Conservation of energy and the disintegration of RaE, L. W. McKeehan—2292(L)
Induced by action of x-rays, G. I. Pokrowski—925
Radioactive disintegration, A. Bramley—1567(L)
Raman spectra
From amorphous and crystalline solids and their solutions, A. Hollaender, J. W. Williams—1739
Benzene substitution products by improved technique, R. W. Wood—2168
Carbon-halogen bond, W. D. Harkins, H. E. Bowers—1845
In certain organic compounds, C. S. Morris—141, M. E. High—1837
Concentrations in benzene-toluene mixtures, E. A. Crigler—1387(L)
Effect of solutes on spectra of water, C. C. Hatley, D. Callihan—909
Removal of continuous background from spectrum of CCl_4, M. E. High, M. L. Pool—374(L)
Relativity
Electrostatic analogy to the gravitational red shift, R. J. Kennedy, E. M. Thorndike—591(A)
Model of universe with reversible annihilation of matter, R. C. Tolman—797
Periodic behavior of the universe, R. C. Tolman—1758
Theory of photoelectric effect, H. Hall, J. R. Oppenheimer—57, 589(A)
Reststrahlen
Investigations, 20 to 40μ, J. Strong—583(A)
Scattering of electrons (see **Electrons in gases, Electrons, scattering of**)
Selection rules
Many-electron selection rules, S. Goudsmit, L. Gropper—225
Shot effect
In photoelectric currents, B. A. Kingsbury—1458, 1922(A)
Solutions
Orientation of H_2O rare earth ions, F. H. Spedding. G. C. Nutting—2294(L)
X-ray study of the nature of solid solutions, R. T. Phelps, W. P. Davey—1919(A)
Sound (see **Acoustics**)
Spark discharge
Breakdown potential and electrode material, L. B. Loeb—1891
Fall of potential in the initial states, J. C. Street, J. W. Beams—416
Optical study of the formation stages, F. G. Dunnington—1535
Specific heat
Of methane, D. S. Villars, G. Schultze—998; D. P. MacDougall—2296(L)
Temperature and pressure variation of C_p, CO_2 and He, E. J. Workman—587(A)
Spectra, absorption (see also **Absorption of light**)
Of AgBr and AgI, B. A. Brice—658
Of Br_2, infrared, vibrational analysis. W. G. Brown—1187
Of Br_2, visible, vibrational analysis, W. G. Brown—1179
Of ClO_2, H. C. Urey, H. Johnston—58(A), 2131
Of ethane and ethylene in infrared, R. M. Badger, J. L. Binder—1142
Of Gd^{+++} ion in crystals, F. H. Spedding, G. C. Nutting—2294(L)
Of Gd, S. Freed, F. H. Spedding—670
Of HCN in gas and liquid, F. S. Brackett, U. Liddel—582(A)
Of I_2, W. G. Brown—709
Infrared bands of ammonia, NH_3, methyl bromide, methyl iodide and CO_2, W. W. Sleator—147
Of K_2, nuclear spin, F. W. Loomis, R. W. Wood—854, F. W. Loomis—2153
Line width in Na vapor, S. A. Korff—477
Long wave-length absorption band of CS_2, D. M. Dennison, N. Wright—2077(L)
Magnetic rotation spectrum and heat of dissociation, F. W. Loomis, R. E. Nusbaum—1447
Of N_2O_3, E. H. Melvin, O. R. Wulf—2294(L)
New infrared bands in H_2O, J. W. Ellis—582(A), 693
Of rare earths, S. Freed—2122
Of salts in liquid ammonia, R. W. Wood—1648

Spectra, absorption (see also **Absorption of light** (continued)
Ultraviolet band of ozone, effect of temperature, O. R. Wulf, E. H. Melvin—330
Spectra, atomic
Of alkaline earth metals and inert gases, auto-ionization, H. E. White—1786(L), 2016.
Of Bi II and Bi III, Paschen-Back effect of hyperfine structure, J. B. Green, J. Wulff—2186
Broadening of the resonance line of He, W. Weizel—642
Of C III and C II, I. S. Bowen—128
Deepest term in Au II, R. A. Sawyer, K. Thomson—2293(L)
Doppler effect in Ne canal rays, W. Romig—1709
Of Element No. 87, H. Yagoda—2298(L)
Energy relations in complex spectra, D. R. Inglis—862
Excitation of high optical energy levels, J. E. Mack—193(L); erratum—2300(L)
Of Hg, Cd and Zn under high frequency excitation, J. Okubo, E. Matuyama—1651
Infrared lines of Ne I and He I, J. D. Hardy—2162
Intensities of Balmer emission lines in stellar, O. Struve, H. F. Schwede—1195
Levels for equivalent (s, p, d, f) electrons with (jj) coupling, S. D. Bryden, Jr.—1145
Of Li I, isotope separation, D. S. Hughes—857
Low voltage excitation of Na, W. C. Michels—712
Of N I, K. R. More, O. E. Anderson—1995
Of Rb II, O. Laporte, G. R. Miller, R. A. Sawyer—843
Of Sn I, infrared, H. M. Randall, N. Wright—457
Of Tl II and Tl III, Paschen-Back effect of hyperfine structure, J. B. Green, J. Wulff—2176
Of Tu, Yb and Lu under different excitations, A. S. King—583(A)
Of V I isoelectronic sequence, H. T. Gilroy—2217
Spectra, continuous
Emission spectrum of metallic Ag under electron bombardment, F. L. Mohler—1923(A)
Spectra, general
Effect of temperature on band spectrum of Hg, W. M. Nielsen—888
Electrostatic analogy to the gravitational red shift, R. J. Kennedy, E. M. Thorndike—591(A)
High current vacuum arcs, A. S. King—590(A)
Investigations in the far infrared, J. Strong—1818
Light of the night sky and aurora lines, J. Kaplan—1048
Many-electron selection rules, S. Goudsmit, L. Gropper—225
Summation rules and perturbation effects in complex spectra, G. R. Harrison, M. H. Johnson, Jr.—757
Ultra-ionization potentials in Hg vapor, A. G. Shenstone—873
Wave-length standards, C I and Sn in Schumann region, R. V. Zumstein, D. S. Marston—305, of Al, Si and Bi, R. V. Zumstein—2214
Spectra, molecular (see also **Molecular structure and constants**)
Alternating intensities of Na_2 bands, H. C. Urey—1074(L)
Of benzene, vibrational frequency in the normal state, C. V. Shapiro, R. C. Gibbs, J. R. Johnson—1170
Emission spectrum of CO_2, H. D. Smyth—2000
Faint branches in OH bands, G. M. Almy, G. D. Rahrer—1816
Infrared bands of slightly asymmetric molecules, H. H. Nielsen—1432
Intensities by graphical methods, E. Hutchisson—1921(A)
Intensity of $\lambda 600$ band of He, J. L. Nickerson—1907(L)
Interpretation of the BeF bands, R. S. Mulliken—836(L)
New bands in Hg vapor, J. G. Winans—583(A)
Of N_2O, infrared, E. K. Plyler, E. F. Barker—1827
O_2^+ bands, rotational analysis, D. S. Stevens—1292
Ortho-helium, band spectrum, Zeeman effect, J. S. Millis—1148
Perturbations in He band spectrum, G. H. Dieke—646
Red CN band system, F. A. Jenkins, Y. K. Roots, R. S. Mulliken—1075(L)
Rotational analysis of the first positive (N_2) bands. S. M. Naudé—372(L)
In SO_2, T. C. Chow, H. D. Smyth—838(L)
A-type doubling, electron configuration in diatomic molecules, R. S. Mulliken, A. Christy—87
Ultraviolet of CO, electrodeless ring discharge, H. P. Knauss, J. C. Cotton—1190
Vibrations of pentatonic tetrahedral molecules, H. C. Urey, C. A. Bradley, Jr.—1969
Spectra, Raman (see **Raman Spectra**)
Spectroscopy, technique
Band spectrum intensities by graphical method, E. Hutchisson—1921(A)
High current vacuum arcs, A. S. King—590(A)
In the far infrared, J. Strong—1818
Second and third spark spectra in a hollow cathode lamp, C. W. Gartlein, R. C. Gibbs—1907(L)

Stark effect
Stereophotographic models of electron motion, R. W. Wood—346
Sun (see **Astrophysics**)
Surface tension
Surface energy of liquids, H. Margenau—365
Thermal conductivity (see also **Heat transfer**)
Reciprocal relations in irreversible processes: II, L. Onsager—2265
Thermal radiation
Of colored and pure fused quartz, R. W. Wood—487
Intercomparisons of the high temperature scale, W. E. Forsythe—1247
Thermal expansion
Macroscopic and lattice expansion of Bi single crystals, A. Goetz, R. C. Hergenrother—2075(L)
Thermionic emission (see **Electrons, thermionic**)
Thermionic emission of positive ions
From Cu and Ag, H. B. Wahlin—1074(L)
Thermodynamics
Fundamental thermodynamics, G. N. Lewis—376(L)
General adiabatic equation for gases, T. C. Huang—1385
Model of universe with reversible annihilation of matter, R. C. Tolman—797
Reciprocal relations in irreversible processes: II, L. Onsager—2265
Relativistic thermodynamics and behavior of the universe, R. C. Tolman—1758
Ultra-ionization potentials (see **Potentials, critical**)
Valence
Directed valence in molecules, J. C. Slater—1109
Forces in Li and Be, J. H. Bartlett, Jr., W. H. Furry—1516
Quantum theory and electron pair bond, W. Heitler—243
Structure of the groups XO_3, J. C. Slater—325
van der Waal forces
Quadrupole forces, H. Margenau—747; 1785(L)
Virial coefficient
Second virial coefficient, application to He, J. G. Kirkwood, F. G. Keyes—576(L); H. Margenau—1785(L)
Viscosity
And molecular arrangement in octyl alcohols, G. W. Stewart, R. L. Edwards—1575, G. W. Stewart—2082(L)
Vision
An electromagnetic theory, S. R. Cook—587(A)
Relation of wave-length to color sensation, C. A. Rinde—588(A)
Wave mechanics (see **Mechanics, quantum, etc.**)
X-ray absorption
By Hg vapor in *L* region, F. M. Uber—217
In ionization chamber, S. K. Allison, V. J. Andrew—441
K absorption calculated for Sn, L. C. Roess, E. H. Kennard—1263
M-series of Ta, C. A. Whitmer—1164
Photoelectric absorption of ultragamma radiation, H. Hall, J. R. Oppenheimer—57, 589(A)
Soft x-rays in gases, R. G. Spencer—1932
X-rays, diffraction, scattering, reflection and refraction
Atomic scattering power of Cu and O in Cu_2O, G. A. Morton—41
Dependence of Compton line breadth on primary wave-length, J. W. M. DuMond—1094
Diffraction patterns of mixtures, A. W. Kenney, H. Aughey—1388(L)
Dispersion in calcite, L. A. Pardue—1808
Effect of temperature on scattering from rocksalt, W. D. Claus—604
By gases and crystals, G. E. M. Jauncey—1, G. E. M. Jauncey, G. G. Harvey—1071(L)
General radiation and diffraction by liquids, W. C. Pierce—1409
Grating constant of calcite crystals, J. A. Bearden—1389(L), 2089
Higher order effects in liquids, W. C. Pierce—1413
In organic mixtures, A. W. Meyer—1083
Piezoelectric oscillation and the intensity of x-ray reflections, B. E. Warren—572(L), R. M. Langer—573(L); C. S. Barrett—832(L); S. Nishikawa, Y. Sakisaka, I. Sumoto—1078(L); G. W. Fox, J. M. Cork—1420; C. S. Barrett, C. E. Howe—2290(L)
From polyatomic gases, G. E. M. Jauncey—194(L); by quartz, of Cu *K* series, J. A. Bearden—835(L)
Scattering from Al, Cu, and Pb and paraffin, A. W. Coven—1424
From sylvine, G. G. Harvey—593, at low temperature, G. E. M. Jauncey, G. G. Harvey—1925
Temperature and diffuse scattering from crystals, Y. H. Woo—6
X-ray study of the magnetic character of liquid, G. W. Stewart—931
X-rays, emission
Corrected relative intensities of the x-ray lines in the tantalum *L*, V. Hicks—572(L)
New *K*-series line, delta, J. W. M. DuMond, A. Hoyt—839(L)
Relative intensities of lines, S. K. Allison, V. J. Andrew—441

X-rays, emission (continued)
Satellites of $L\beta_2$ for atomic numbers 50 to 60, R. D. Richtmyer—1802
Satellites of M-series, F. R. Hirsh, Jr.—914
Shape of Ag L, Mo K and Cu K lines, R. O. Spencer—630
Structure of soft x-ray lines, W. V. Houston—1797
X-rays, spectroscopy
Double spectrometer, theory of, R. C. Spencer—618
Resolving power of double crystal spectrometer, S. K. Allison—203
Zeeman effect
Hyperfine structure, Paschen-Back effect in Bi II and Bi III, J. B. Green, J. Wulff—2186
Hyperfine structure, Paschen-Back effect in Tl II and Tl III, J. B. Green, J. Wulff—2176
In intermediate coupling, D. R. Inglis, M. H. Johnson, Jr.—1642
Multiplet structure, Sn III and Sb I, J. B. Green R. A. Loring—1289
In ortho-helium band spectrum, J. S. Millis—1148
Patterns at intermediate strengths of field in Ca I W. Bender—588(A)
In solids, F. H. Spedding—2080(L)
